SHOOT THE MOON
LIMITED EDITION

Jules Verne & S.T. Dupont

A remarkable pair

.....

This new Limited Edition collection is the result of a perfect match between two remarkable 19th-century celebrities. In 1872, the first of the duo, Simon Tissot-Dupont invented the art of travel for leading figures of the time. His counterpart, Jules Verne, foresaw travel in outer space, which would change the history of mankind forever.

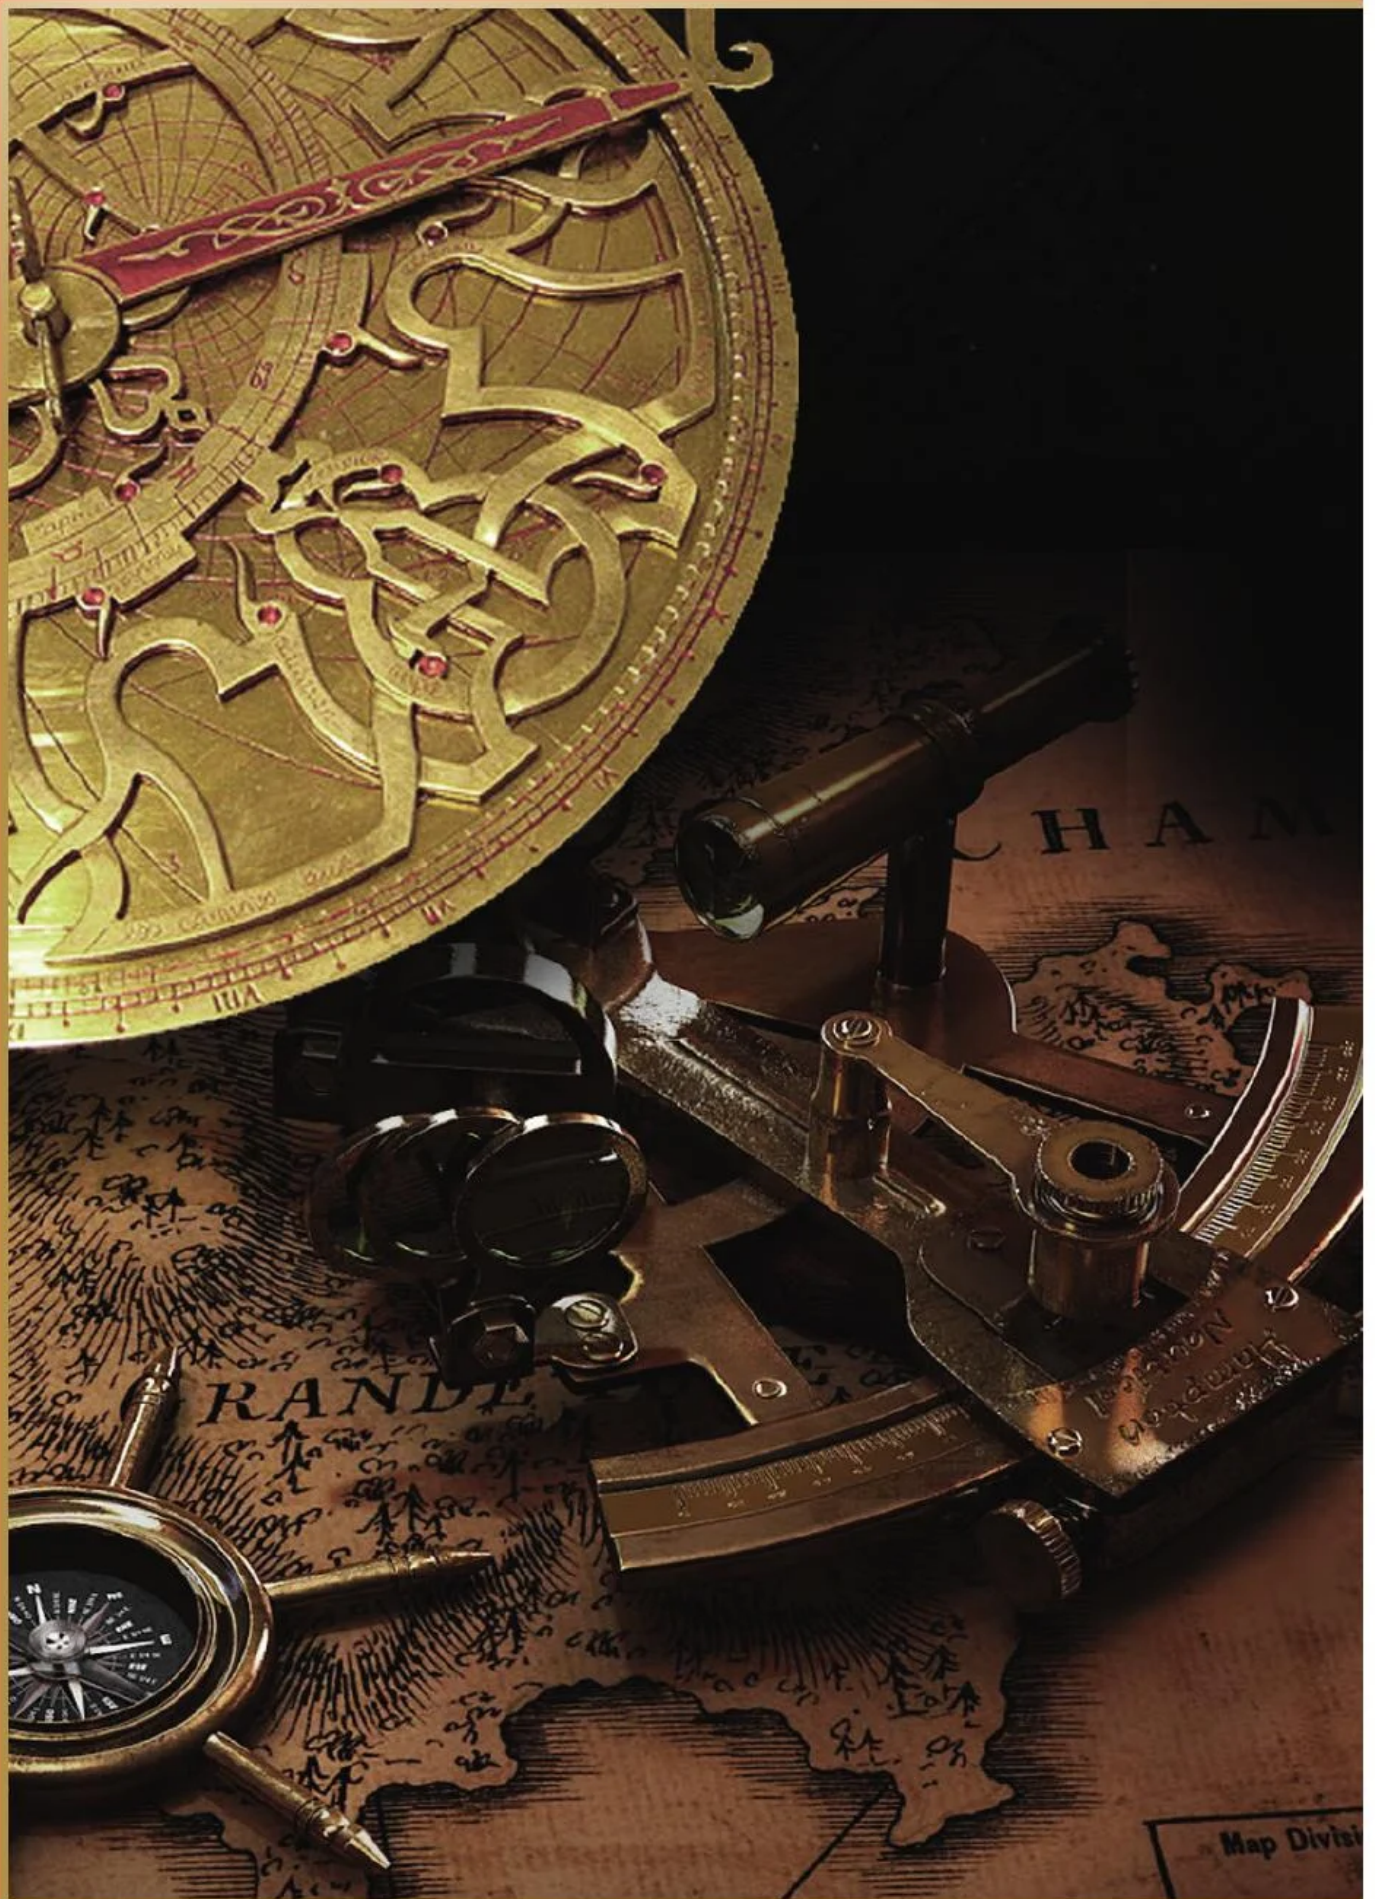

Shoot the Moon

*A celebration of imagination
and excellence*

The theme of "Shoot the Moon" stems from the French writer's most famous work, "De la Terre à la Lune" (From the Earth to the Moon). The collection also celebrates the power of the imagination and its capacity to change the world. In the same way, the craftsmen of the Faverges workshops used their hands to mould Chinese lacquer, rare metals and precious stones. Inspired by this otherworldly novel, in which three adventurers reach the moon on board a vessel shot out of a huge cannon, the craftsmen designed and created new, exceptional and ultra-sophisticated objects.

PRESTIGE COLLECTION

The Prestige Collection is marked by articulated gold parts and decorations engraved on hand-painted Chinese lacquer. The colour of the lacquer is reminiscent of 19th-century leather goods, and these warm shades amplify the pale glow of the fascinating moonstone which perfectly complements each piece. To mark the year the novel was published, 1,865 numbered editions have been made.

PRESTIGE COLLECTION

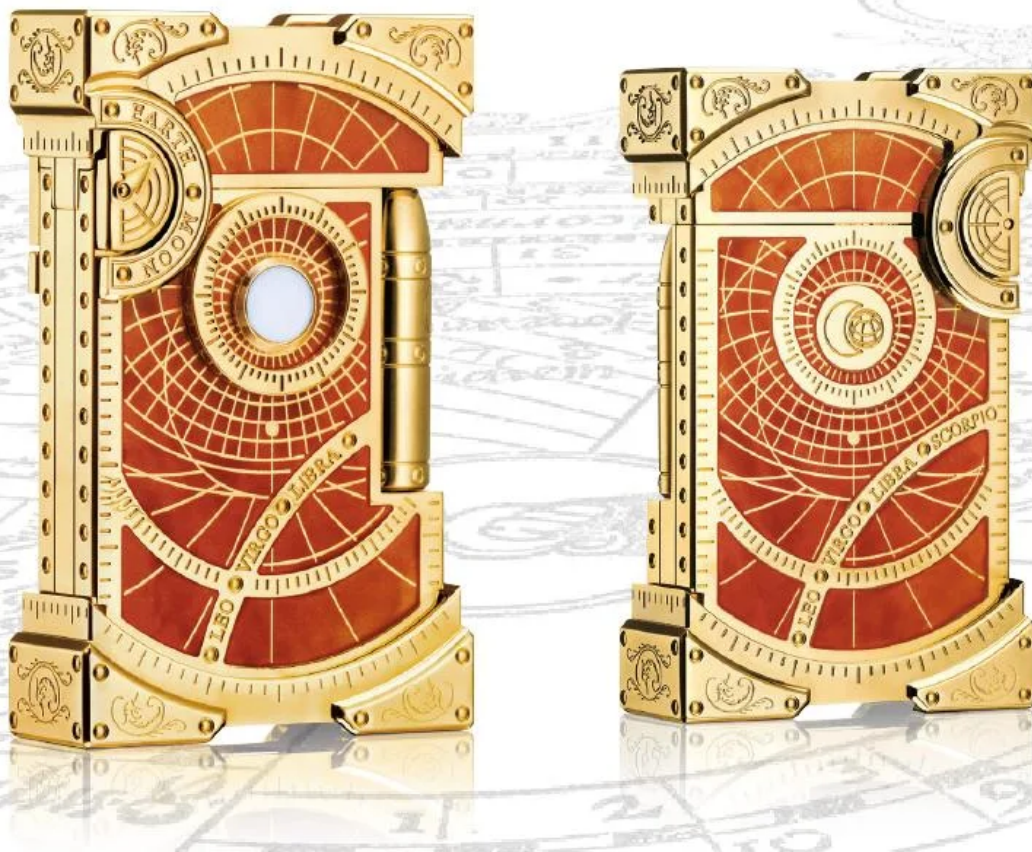

Inspired by the finest French artillery, these writing instruments are fitted with a twistable piston system on the clip and a rotating ring featuring the various phases of the moon. Once placed in its case, the pen becomes a spectacular representation of the cannon that hurls Jules Verne's rocket invention to conquer the moon.

PRESTIGE COLLECTION

When opened, this lighter's special mechanism moves an arrow which is symbolic of the journey from Earth to the Moon. The engraving illustrates a stylish astrolabe, the essential tool of ancient explorers. The lighter's roller imitates the shell-shaped rocket that would send humanity into outer space.

PRESTIGE COLLECTION

This exclusive selection is encased in leather, representing a celebration of the Master Trunk-Maker, which formed the basis of S.T. Dupont's reputation from 1872. A fountain pen with a rollerball adapter, a pen case, a lighter, cufflinks and a travel diary encased in leather are luxuriously presented in this selection. The inside of the cover is decorated with an engraving inspired by the collection's theme.

PRESTIGE COLLECTION

For the first time leather goods appear as part of a Limited Edition in the form of travel and conference bags. Nineteenth century-style amber patina leather adorns these two leathergoods items, each one printed with a globe and decorated with engraved gold corners.

The collection is completed with gold-edged cufflinks, each one fitted with a moonstone.

DIAMOND COLLECTION

The extraordinary pieces from this Limited Edition are the ultimate expression of S.T. Dupont-style luxury. Like a twilight sky scattered with an array of meteors, the Diamond collection is adorned with midnight blue hand-painted Chinese lacquer, engraved with delicate platinum patterns and adorned with a constellation of white sparkling diamonds. Each piece is available in twenty-eight numbered editions worldwide.

DIAMOND COLLECTION

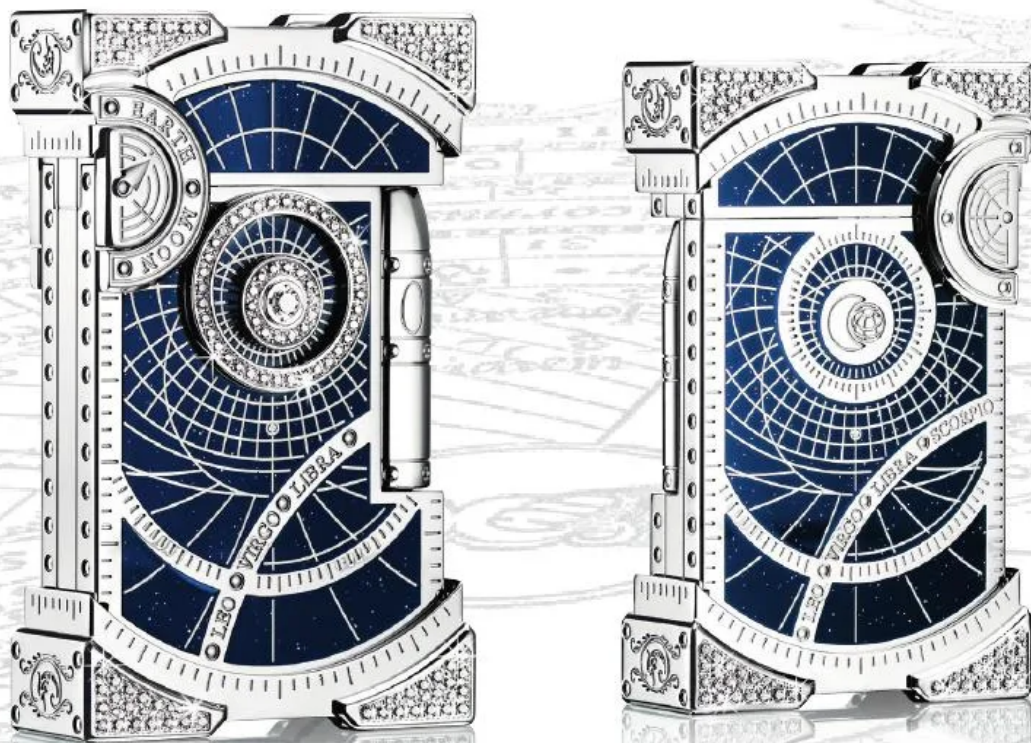

.....
This writing instrument's 237 white diamonds, totalling 2.29 carats, shine just as bright as the Milky Way. Inspired by 19th century cannons, the pen is fitted with a rotating ring that displays the phases of the moon and includes an articulated piston on its clip. This exceptional piece is majestic when displayed in its case, which is shaped like a gun carriage and decorated with 19th century-style patterns.

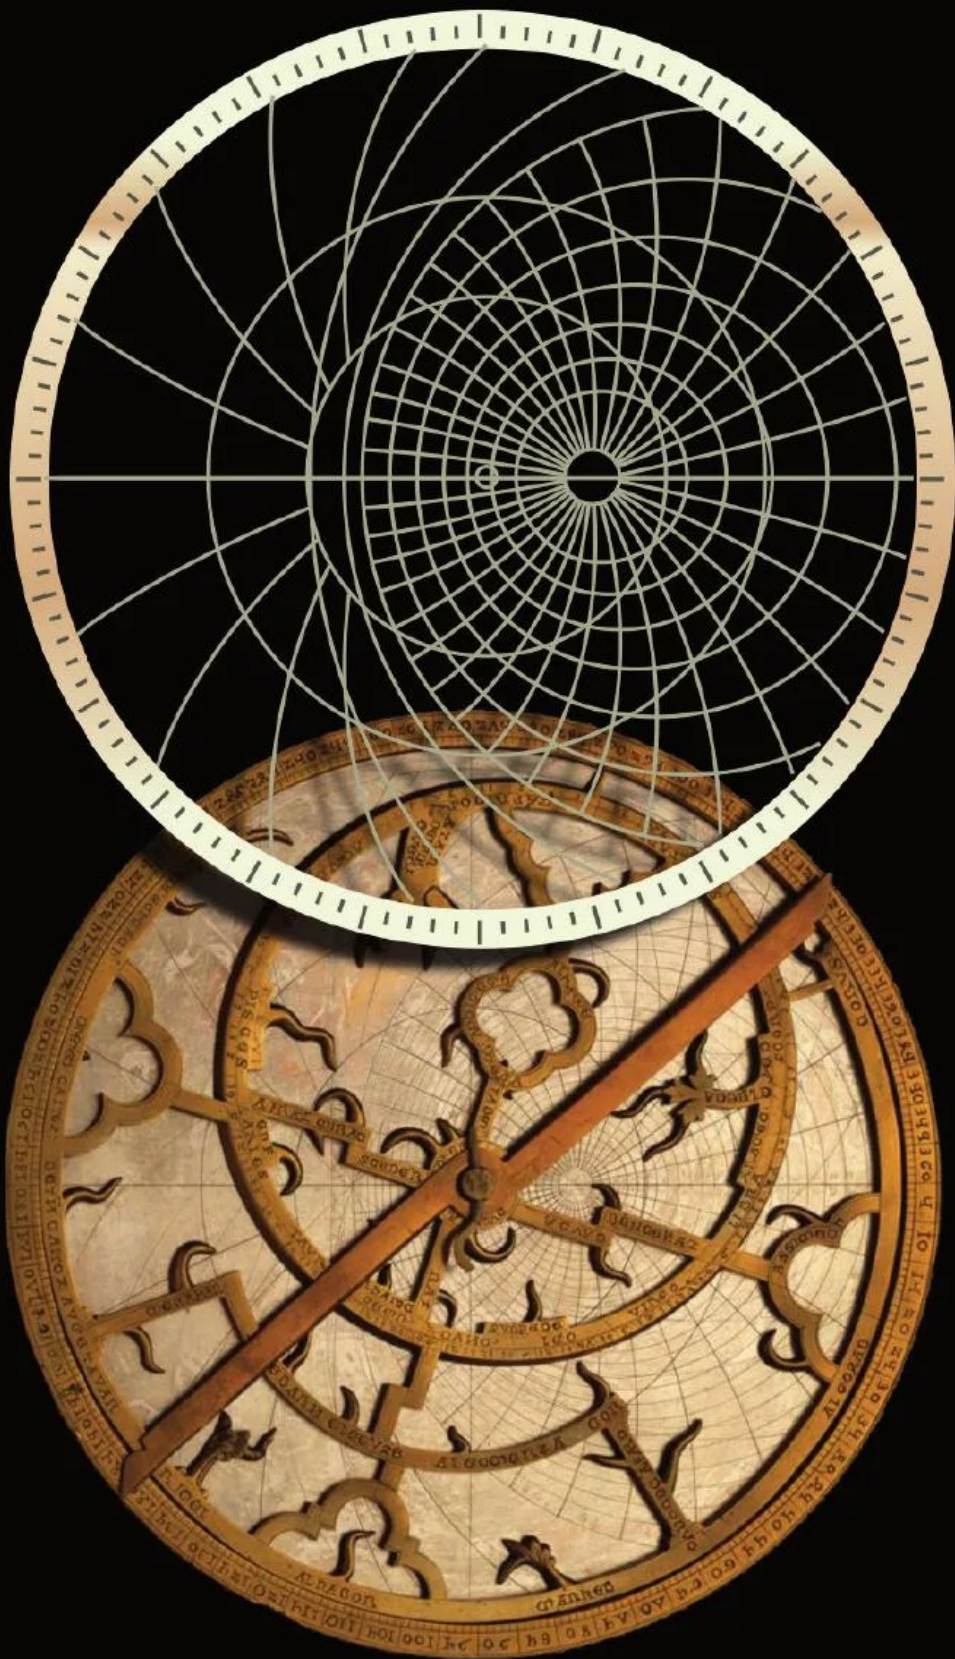

DIAMOND COLLECTION

The extravagant lighter is coated in 205 white diamonds, totalling 2.29 carats. The platinum accents reflect the astrolabe, while the moving arrow symbolising the flight from Earth to the Moon pivots when the top opens with its signature “ping” sound. The roller is sculpted and polished into the shape of a rocket warhead.

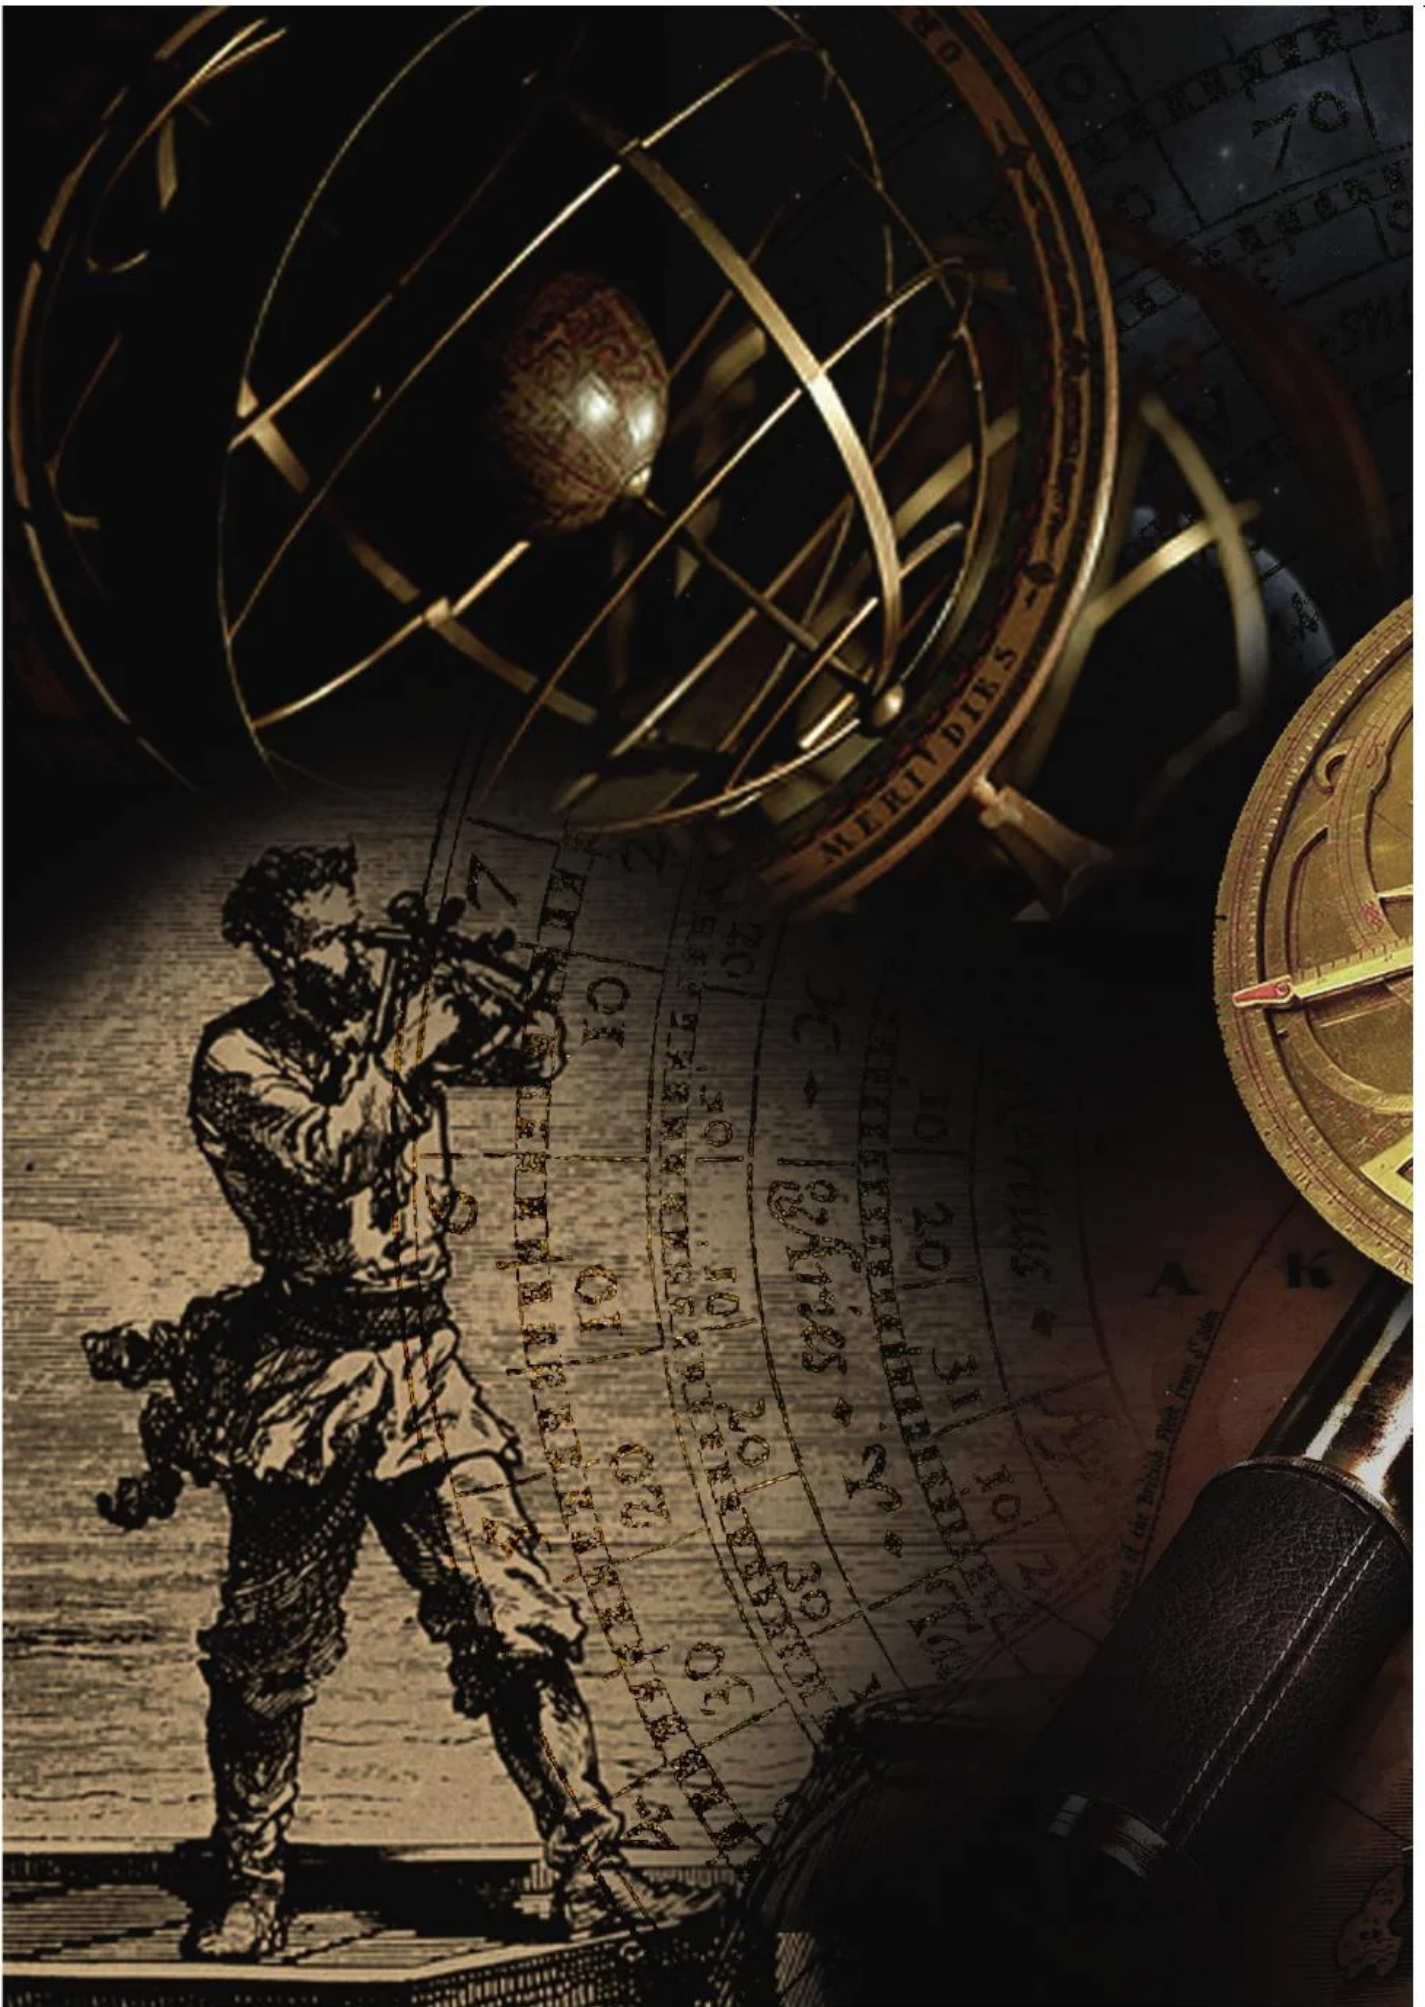

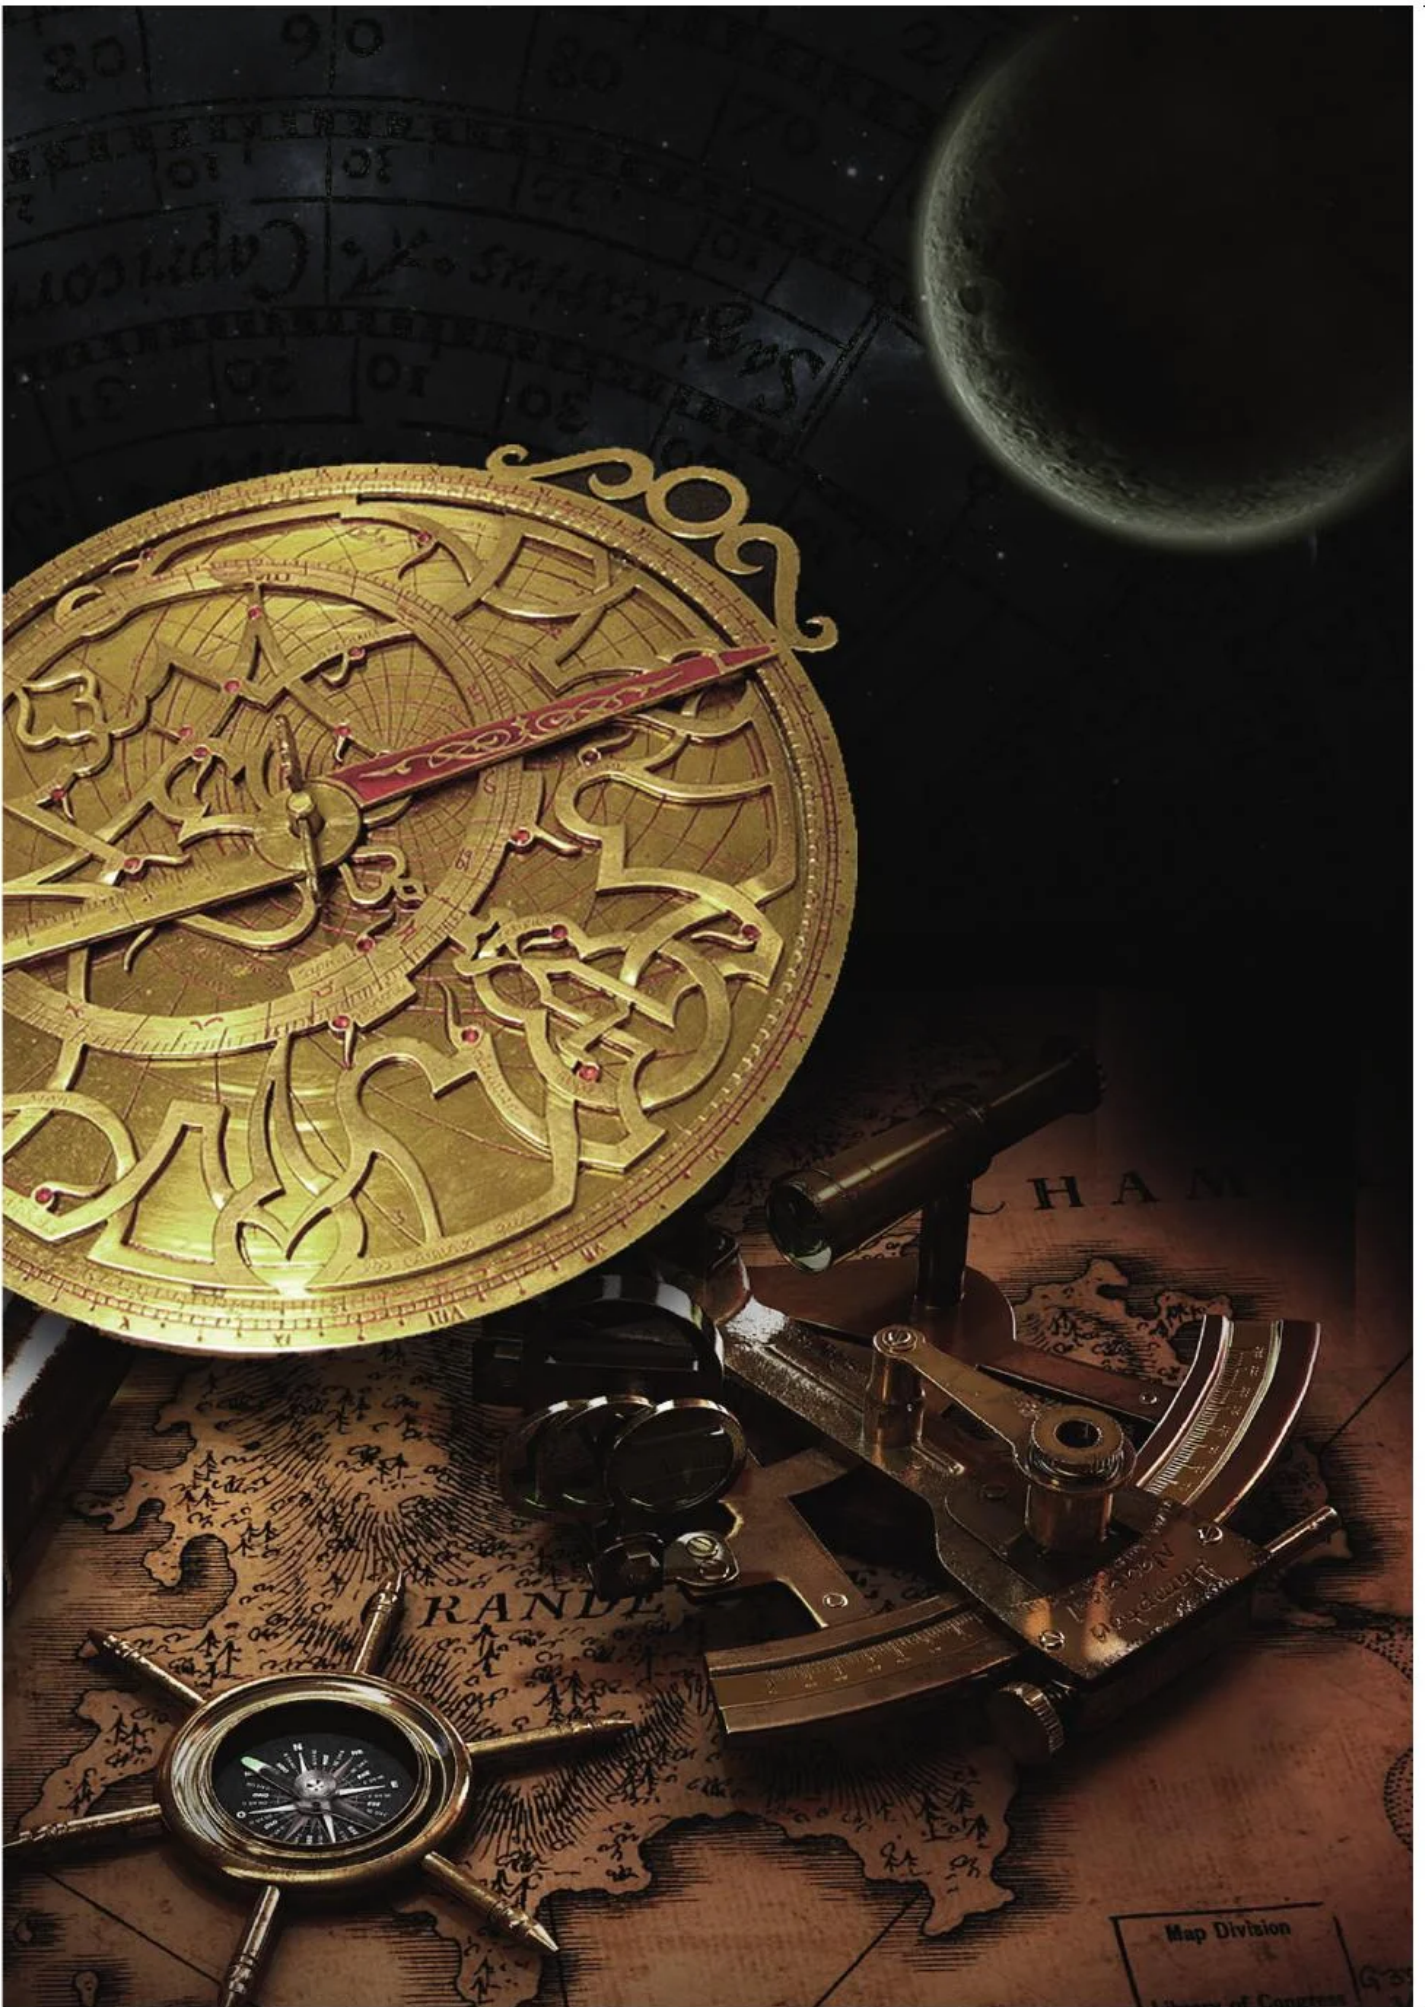

PREMIUM COLLECTION

The "Premium" Collection evokes a fascinating star-speckled sky bathed in moonlight. Each piece is coated in a deep black lacquer accentuated with silver glitter and engraved with details reflecting the novel's epic lunar saga. This limited series is available in 1,865 numbered editions.

The lighter stands out with straight lines contrasted against its 19th century-style inspired ornaments. The writing instruments combine the perfect simplicity of a timeless outline with the rich and lavish nature of the ornaments inspired by Jules Verne's time.
